OTHER NEWS AND FORTHCOMING EVENTS

Christian Aid Week – 12th to 18th May

On 12th May there is an ecumenical service in Christchurch at 10.30am when the preacher will be a representative from Christian Aid.

On Saturday 19th May there will be the annual street collection between 9am and 1pm. Volunteers to 'shake a tin' are urgently needed. If you are able to offer just one hour between those times it would be greatly appreciated and you will be helping to raise money and also raise awareness for this very worthy charity. Please contact Janneke Blokland or speak to Andrew.

Church finances

Spring is upon us and now is a good time to be reviewing your giving to the work of Christchurch. We have recently lost some of our regular users of the premises which means a reduction in our rental income. On the other side our assessment (which we are required to pay to the circuit) will increase this year and other costs (notably gas and electric are also rising). This is how you can help:

- Review your financial gift to Christchurch and consider whether you are able to increase it.
- If you don't currently use the offering envelopes or give by standing order consider whether you could do this. Regular and planned giving makes it much easier for budgeting the church finances.
- Gift Aid adds value to your gifts at no cost to you. For every £100 you give the government adds £25. If you want further information please speak to Andrew.

Away Weekend

The Van Diemens TLC group are planning another weekend away in the autumn and would like to extend the invitation to any other church members who would like to join them for conversation, fun, learning together and fellowship. It will be from 1st to 3rd November at a venue near Shaftesbury and costs (full board) £130 per person (small supplement for single room). Please speak to Helen Langley to book a place.

Colour my World by Kate Trowbridge

As the main holiday season is about to begin I hope you will find new ways of relaxing and recharging the batteries. Unconvinced of our predicted 'barbecue Summer' many of us will go travelling in search of cloud free days and warm sunshine. We enjoy travelling and I am always fascinated to note that as we journey through the regions of a country not only does the architecture change but the whole colour range changes too. Colours define a place. Think of the orange, white and deep blue of the Mediterranean countries, or the green and slate grey of North Wales. Imagine the blinding whites and icy cool blues of snowy regions set against the orange, reds and browns of sandy rocks and deserts. Colour defines a region and its people.

Colour plays an important role in the animal kingdom. Colourful markings are used for display and attraction, or to warn off would be predators. Colours can also be the means of perfect camouflage for a creature in danger of becoming an early lunch for another. Almost from birth we see in colour, but that is not so for all creatures. Dogs see in red, green and yellow; cows see in purple, black and white; and horses see only in black and white.

We live in a world of colour, and colour plays a huge part in our lives. We use it in our descriptions of ourselves. To be 'in the pink' is a healthy place to be unlike 'looking green' or 'feeling blue'. To be 'red faced' is to admit guilt and 'black looks' signify anger and violence. Fear produces a white face and yellow is associated with cowardice. In another sense colour has played a part in the shaping of whole societies. It is not that long since the so called 'colour' of skin could mark out just where you stood in the hierarchy of a community. Let us never forget the way apartheid divided South Africa, or the effect that white slave traders had in oppressing black peoples.

Can you imagine living in a world without colour? Seeing everything through the eyes of a horse in shades of black, grey and white! Watching the old black and white films is bad enough, but to be denied the riotous range of colour which clothes our world is unthinkable. Sadly there are people in our community who live life in a perpetually grey world. Bereavement, loneliness, fear, lack of self worth all paint their days an endless shade of grey. How they long for splinters of colour to relieve the monotony. Each of us can provide those flashes of colour with a smile, a kind word, a few minutes of conversation, some time spent just listening.

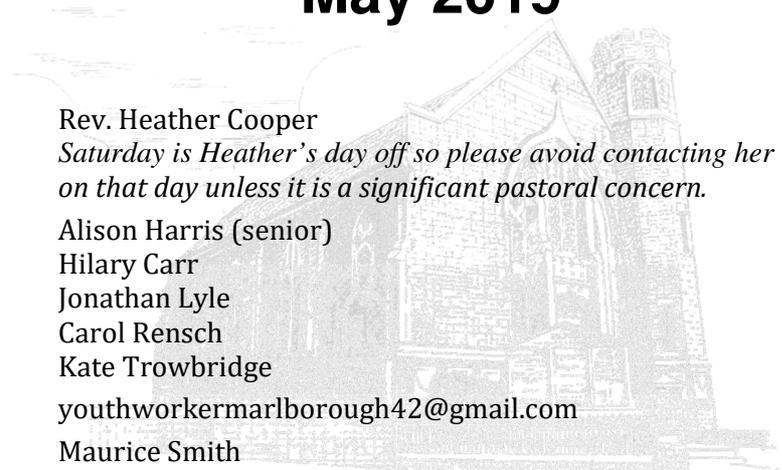

So go on – put a bit of colour back into the lives of those you meet this week - for God created us to be the colour in his rainbow world.
